

Some Splendid Features In This House

This comfortable bungalow is distinctly a home to be proud of. It has those features considered essential by so many prospective builders this year—rather plain lines and moderate in cost, attractive exterior, and a practical interior arrangement, with sufficient bedroom space for the small family.

Come in and we will show you the blue prints of this house, and many others that we have, and we will guarantee to furnish the material for any house that you may select at a price equally as low or lower than you can buy it for elsewhere, whether it is in Chicago or Belding. You will not have to wait to have the stock shipped in either, as we have it right here in our sheds, ready for your order.

The Purpose.

Proportion is almost impossible to human beings. There is no one who does not exaggerate. In conversation men are encumbered with personality, and talk too much. In modern sculpture, picture and poetry, the beauty is miscellaneous; the artist works here and there and at all points, adding and adding, instead of unfolding the unit of his thought. Beautiful details we must have, or no artist; but they must be means and never other. The eye must not lose sight for a moment of the purpose.—Emerson.

Measurement of Ear Corn.

There seems to be no general standard measurement of ear corn. In some parts of the country the custom is to figure double the quantity of ear corn to that of shelled corn. The standard United States bushel contains 2,150.4 cubic inches, so in measuring ear corn the bushel would be 4,300.8 cubic inches. The weight of a bushel of dry ear corn is seventy pounds in every state except Indiana and Ohio, in which it is sixty-eight pounds, and Mississippi, in which it is seventy-two pounds.

Bearskins in Summer.

The Turkish pashas in Asia Minor believe in keeping out the heat as well as the cold, and it is not uncommon to see in many parts of the country people wearing huge bearskin coats in the midst of summer, with the thermometer standing at 80 degrees.
